

Home Learning Autumn 1 Ancient Greeks

Ancient Greeks have influenced so much of modern living from politics, writing, story-telling, building and architecture as well as Science, sport, Geography and technology.

STEM

We know so many things about the Ancient Greeks because we have found artifacts in the ground from the past. Can you bury something in the ground and see how it changes over this half term. What is left? How did it change? What could we learn from it?

Record the changes in the artifact that you buried with pictures or photographs. What things wouldn't survive well in the ground and why?

PROJECT

Can you find out about a Greek God and create a fact file, learn the myths about them, draw a picture of them or create a statue of them?

Can you find out about taking a holiday in Greece and make an itinerary of places to visit that are important for learning about Ancient Greeks?

ARTS

We have lots of stories, statues and examples of musical instruments from the Ancient Greeks. Can you make a pot, statue, building, instrument or even your own story from the Ancient Greek times? You could make a maze for the Minotaur or a Trojan horse.

Due Date

Monday 11th October 2021
