

Home Learning – Year 5

Spring 2 – Our Planet

Choose one or many of the suggestions below. In class, we will share all our entries. All winning entries will be shared in our Home Learning Celebration.

Arts

Our Planet is a work of art in itself! Many artists are inspired by landscapes around where they live or have travelled to.

Can you find out about some different landscape artists?

This painting is by Claude Monet of a Japanese bridge. Could you recreate a landscape painting of somewhere near your home? Alternatively, use

Google maps to find images of a different biome (the mountains or deserts for example) to paint?

STEM

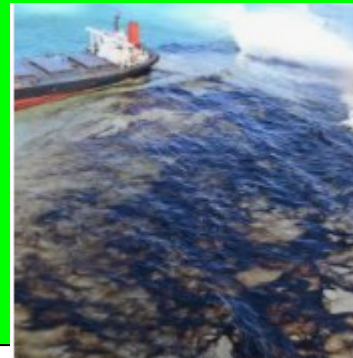

(Science Technology Engineering Mathematics)

We will be considering the impact human life has upon our planet and the environment.

Sometimes, oil tankers spill oil into the ocean and this can have a huge effect on marine life including birds that live at sea.

Can you design a safe and effective way to clean up an oil spill using your knowledge of water and oil?

Use this link to help you <https://stemactivitiesforkids.com/2016/04/22/earth-day-stem-challenge/>

Music

In 2001, George Fenton wrote the soundtrack for the BBC's 'The Blue Planet' TV Series.

This was a series of classical music tracks for each of the marine animals from the show. Listen to a few of the tracks and look at the names - what about each track reminds you of the creature it was written for? https://www.youtube.com/watch?v=krLqQCzMSU&ab_channel=JasperBianc-hoten
