

## How to Tame a Giant

Have you ever dreamed of taming a giant? Giants might seem big and scary but you can befriend them and even tame them! This guide will tell you step-by-step instructions for how to do it safely and kindly.

You will need:

- A giant
- Patience
- Kindness

1. Find a Giant. Giants usually live in faraway lands or deep, green forests. You will need to look around carefully so you don't scare them away.

2. Next, approach the tall, powerful giant with kindness. When you meet a giant you need to wave, smile and greet them politely. Offer them something they like, such as a flower or a delicious treat. Remember to stay a safe distance away until you're sure the giant is friendly.

3. Communicate with the giant carefully. Even though giants are big, they can be sensitive too. Speak softly, quietly and kindly to them. Use simple words and actions to show that you want to be friends. If the giant seems scared or confused, take a step back because they will need some space.

4. Now, earn their trust. Trust is essential when taming a giant. Spend lots of time with the giant by playing games or sharing your favourite, exciting stories. Show them that you can be trusted by keeping your promises and being gentle with them.

5. Finally, be patient! Taming a giant takes time and patience. Don't get upset if your progress is slow. Keep being kind, gentle and caring because eventually, the giant will be your best friend. Remember to celebrate your friendship. How wonderful it is!

Congratulations! You now know how to tame a giant. Remember with kindness, patience, and respect anything is possible. What adventure are you going to go on next?
